March 25, 1980

Dear Doctor: *hu*

The following are our contributions to the Pathology Slide Club Meeting, Friday March 28th, 1980.

- 1 T. Cooney 80B 28-4 73 year old female who lived for 16 years in a home for the elderly. She always appeared in good health but complained of chronic constipation. Was hospitalized because of a severe attack of influenza. Chest radiograph on admission showed right middle lobe collapse and a bronchogenic carcinoma of right middle lobe. bronchus, was suspected. Bronchoscopy revealed a normal bronchial tree. The section is from the right middle lobe.

- 2 D. Cavers S78-1075-3 6 week old male with large retroperitoneal mass.

- 3 W. Orr 80-3391 -1 81 year old woman. 6 month history of lump in submandibular region. No evidence of tumour elsewhere.

- 4 H. Benediktsson 80B28 29 year old male with fever and pulmonary infiltrates. Mediastinal lymph node.

- 5 ✓ D.W. Buntine RB80 1869 T, V, U. 78 year old female ovarian tumour, 12 x 10 cm. Solid.

- 6 W.S. Hwang S73-606A Female 5 years. Painless swelling right knee.

- 7 N.M. Pettigrew 80-4867 Skin rash in male aged 50.

April 7, 1980

Dear Juan:

It is nice to see you again. Enclosed are the slides from our meeting in March, but you already had the remainder. RB 80-1869 is the case of malignant giant cell tumor of the ovary, which might be a good one for Dr. Scully's seminar.

The members are also appreciate your comments on our case 2731-77 in January meeting, which is the fibrosarcoma & carcinoma. Dr. Fechner has seen this case, he agrees with the diagnosis, but uncertain about the possibility of upstaging. There is another case in January meeting, 79-3257 - 45 yr old lady's hypometrial tumor. The opinions at the meeting were either a cellular leiomyoma with progestin effect or a borderline leiomyosarcoma.

Thank you for your comments.

Sincerely yours

Laudence

SLIDE CLUB MEETING # 73

170 Old Mill Road 28 MAR 1980

Present: Drs. W. F. Orr, L. Lu, R.G. Stark, B.G. Johnston, N.M. Pettigrew, D. Cavers, H. Benediktsson and R. Banerjee

Contributing Members: Drs. D.A. Owen, D.W. Buntine, W.S. Huang

Dr. R.G. Stark
St. Boniface General
Hospital

2612-80 Female 61 yrs. Mucous retention cyst of right ventricle of larynx removed two years ago. Now recurrent hoarseness. Polypoidal cyst now found overlying right upper vocal cord. Ruptured on removal

Oncocytic cyst of larynx
Ref. Oncocytic lesions of the larynx, John C. Gallagher and Benjamin Q. Puzos Ann. Otol. Rhinol. Laryngol. 78: 307-318, 1969

Dr. D. A. Owen

80-967 Female 37 yrs. Previous operation for carcinoma of breast.
Ovary

Metastases (x2) from lobular carcinoma of breast.

Dr. D.W. Buntine
Brisbane, Australia

80-4505A Female 25 yrs. Menstrual irregularity. Solid ovarian tumour 6.0 cm in diameter.

Sclerosing stromal tumour of ovary

Dr. B.G. Johnston
Misericordia General
Hospital

9371-80 Male 33 yrs. Curettings from a gradually enlarging soft tissue swelling over M-P joint of little finger of 1 years duration, associated with mild discomfort. X-rays showed small irregular cortical osseous defect without soft tissue calcification or significant new bone formation.

Grade I chondrosarcoma (confirmed by Dr. D.C. Dahlin). Amputation specimen demonstrated infiltration of bone

Dr. T. Cooney
H.S.C. - General

80B28-4 Female 73 yrs in home for elderly for 16 years. Chronic constipation. CXR suggestive of bronchogenic carcinoma R.M.L. Bronchoscopy normal. Section from R.M.L.

Mineral oil granuloma

2
Dr. D. Cavers
H.S.C. - General

S78-1075-3 Male 6 weeks of
age with a large retroperi-
toneal mass

Infantile fibrosarcoma
Ref: Infantile fibro-
sarcoma, E.B. Chung and
Franz M. Enzinger, Cancer
38: 729-739, 1976

3
Dr. F.W. Orr
H.S.C.-General

80-3391-1 Female 81 yrs.
6 month history of lump in
submandibular region. No
evidence of tumour elsewhere.

Malignant oncocytic
tumour

4
Dr. H. Benediktsson
H.S.C.-General

80B28 Male 29 years with
fever and pulmonary infiltrates.
Mediastinal lymph node

Miliary TB (plus strongy-
loides and C.M.V.) in a
young immuno-suppressed
Philippino male (2-3 year
in Canada) with renal
transplantation.

5
Dr. D.W. Buntine
Brisbane, Australia

RB80 1869 T.V.U. Femal 78 yrs
ovarian tumour 12 x 10 cm.
Solid.

Malignant giant cell
tumour
Ref. Sarcomas in ovarian
mucinous tumours, Jaime
Prat and Robert E. Scull
Cancer 44: 1327, 1979

Note: No mucinous element
in this tumour

6
Dr. W. S. Huang
H.S.C. - General

S73-606A Female 5 years.
Painful swelling right knee

Synovial haemangioma.

7
Dr. N.M. Pettigrew
H.S.C. - General

80-4867 Male 50 yrs. Skin
rash

Pityriasis lichenoides

Dr. R. Banerjee
Grace Gen Hosp

80-1091 Male 74 years
Prostate

"Atypical" stromal
hyperplasia of the
prostate gland.
Ref: Edward 'B Attah &
Michael E.A. Powell, Am.
J. Clin. Path. 67: 324-332
April 1977

Dr. R. Banerjee
Grace Gen Hosp

80-0520 Female 19 years.
Previous therapy for thyrotoxi-
cosis. Thyroid lobectomy for
"cold" nodule

Papillary carcinoma of
thyroid - radiation
induced and thyroid shows
irradiation changes.
